Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems).

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

CAUTION

1. Never point the camera toward the sun

Do not expose the lens directly to the sun or to strong light as this may damage the pick-up device.

2. Handle this camera with care

Avoid any shock or bumping of the camera. Improper handling could damage the camera.

3. Requires a proper operating environment

This camera is designed for indoor use. The allowable temperature range for operation of this camera is between -4°F ~ 122°F / -10°C ~ 50°C.

4. Clean the front face or lens

It is recommended that the surface be cleaned every 3~6 months. Cleaning should be done by using a chamois, a very fine soft cloth, lens tissue, or cotton tipped applicator and ethanol to carefully remove any fingerprint or dust.

5. Check the power source voltage

The power source voltage should be within the specified range. (Camera must meet the specifications). Camera must be connected to a surge protector at all times.

6. Objects and liquid entry

Never push objects of any kind into this camera as this may touch dangerous voltage points of short out parts that could result in a fire or electric shock. Never spill any kind of liquid on the video product.

7. Servicing

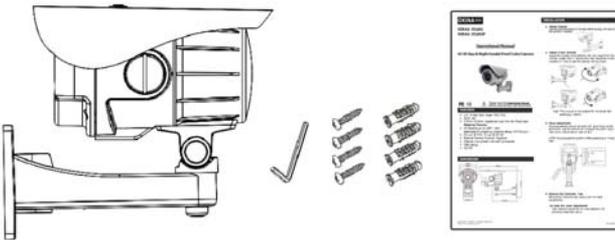

Do not attempt to service this video product by yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all service to qualified servicing personnel.

8. Damage requiring service

Unplug this video product from the wall outlet and refer service to qualified servicing personnel under the following conditions:

- a. When the power supply cord or plug is damaged.
- b. If liquid has been spilled, or objects have fallen into the video product.
- c. If the video product has been exposed to rain or water.
- d. If the video product has been dropped or the cabinet has been damaged.
- e. When the video product exhibits a distinct change in performance.

INSTALLATION

1. Install Camera

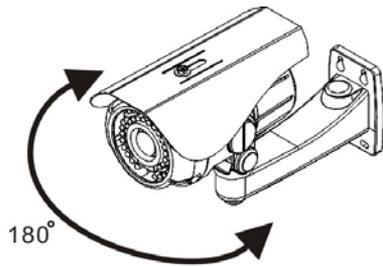

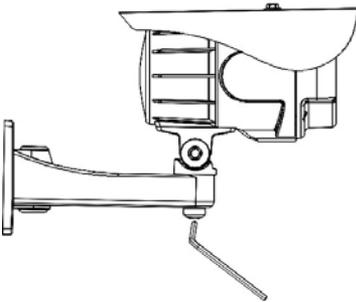

Use the supplied screws and secure the camera in position.

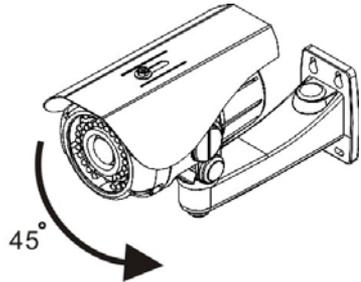

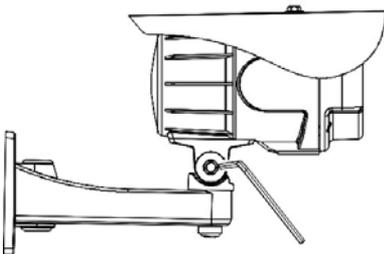

2. Adjust 2-Axis Bracket

Adjust the bracket while checking the view angle from the monitor. Loosen the X-Y screws and then adjust the 2-Axis bracket (X-Y Axis) to get the desired viewing angle.

X-AXIS Adjustment

Y-AXIS Adjustment

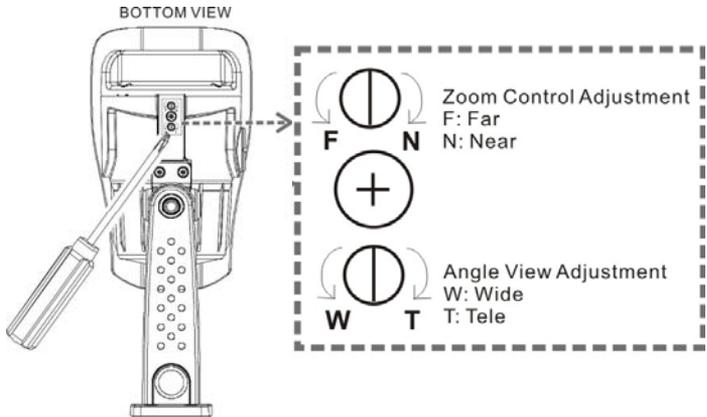

NOTE: This product is not suitable for horizontal 360° continuous rotation.

3. Focus Adjustment

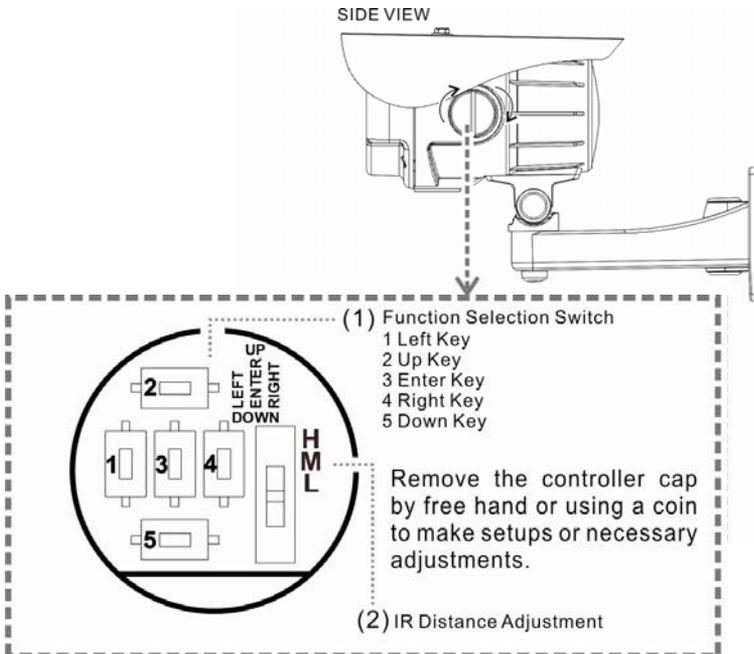

Focus adjustment should be done with zoom focus at the same time. Use the screwdriver to adjust the zoom/ focus ratio (from wide to tele or near to far).

NOTE: Focus adjustment position differs depending on model type.

4. Remove the Controller Cap

With your free hand or a coin remove the controller cap and make adjustments.

(1) Function Switch

- 1 Left Key
- 2 Up Key
- 3 Enter Key
- 4 Right Key
- 5 Down

(2) IR Distance/Power Consumption Adjustment

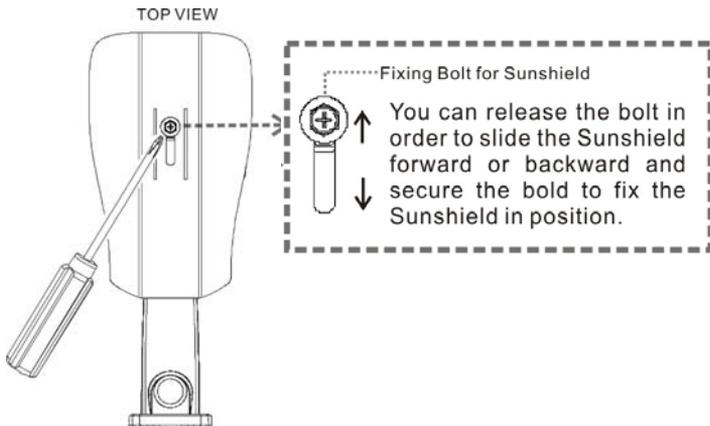

Installer may use IR adjustment function according to installation conditions. It is suggested that the view angle should be checked before setting up the IR distance. Below is the suggested LED brightness and IR distance adjustment table:

LED Brightness	IR Distance	Focal Length	Power Consumption
H (High)	80ft~130ft / 25m~40m	9mm~22mm	750mA
M (Middle)	50ft~80ft / 15m~25m	6mm~12mm	420mA
L (Low)	30ft~50ft / 10m~15m	3.7mm~6mm	320mA

* The suggested LED brightness and IR distance adjustment is for reference only. Please adjust accordingly in regards to the environment the camera is mounted. Use less power if there are reflections.

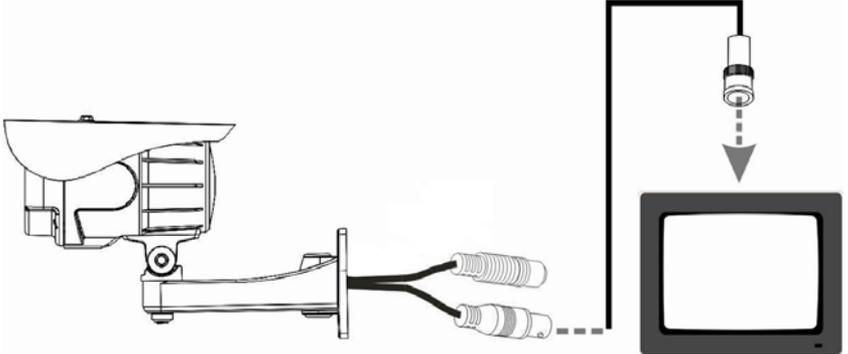

5. Install Sunshield

To install the sunshield, please follow the instruction shown below:

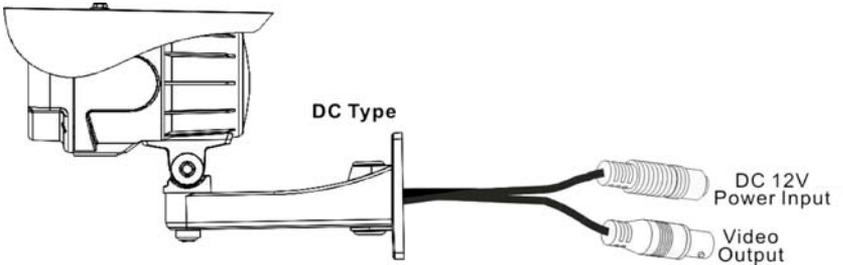

6. Connect to Monitor

Connect the Video-out port of the camera to a monitor. As the connecting method varies depending on the instrument, therefore refer to the manual supplied with the instrument for more information.

7. Connect the Power

Connect to a 12V DC, 500mA adaptor.

LIMITED WARRANTY

OKINA USA products are covered under warranty for one (1) year from the date of purchase. The warranty will automatically be voided if any of the following occurs:

1. Camera sticker is removed

If the camera sticker is removed, we will not be able to confirm any information regarding when and where the product was purchased. We have no other way to verify the purchase record without the serial number on the camera sticker; therefore, it should not be removed.

2. Camera is modified in any way

If the camera is scratched, damaged, or modified in a manner not described in this manual, the warranty will be voided immediately. It is the customer's responsibility to keep the camera in good condition.

3. Video or power cable is cut

The video cable and the power cable should not be tampered with. Cutting or modifying of the cables will result in termination of the warranty.
